

**Attorney's Docket No. TN319**  
**Amendment**

**Serial No. 10/603,407**  
**12/10/04**

**REMARKS**

Claims 2, 5, 7, 8, 12 and 13 are amended. Claims 5 and 8 were rejected based on a reference to named commercially available software. The applicant is appreciative that Examiner noted that said commercially available software may be understood to be in compliance with the well-known IEEE JTAG standard. Accordingly, applicant has amended these two claims to comply with that understanding and believes that no new matter is introduced thereby, because one of ordinary skill in these arts would clearly understand that commercially available software from JTAG Tech is compliant with the IEEE JTAG standard at the time of the filing of this application.

Claims 2, 7, 12, and 13 were objected to and have been modified to comply with the objections.

Believing all present claims allowable, the applicant respectfully requests that the claims be allowed and passed to issue.

Respectfully submitted,

December 10, 2004
